

# The Many Uses of TELEMEDICINE

In addition to routine medical visits,  
**telemedicine can be used for:**

Physical  
therapy

Occupational  
therapy

Speech  
therapy

**During virtual  
therapy appointments,**  
patients may:

Complete therapist-  
guided activities

Have their treatment  
progress assessed

Be prescribed  
adaptive equipment

Have their home  
modifications checked

**Access to telemedicine encourages:**

Disease  
management

Appointment  
attendance

Optimal clinical  
outcomes

Personalized  
care

Coupled with  
in-person care, virtual  
appointments are an  
important option for  
**all patients.**
